

Celebrate Earth Day with #1MorePledge

April 21, 2017

At Arlington Landfill, environmental stewardship is at the core of all we do to serve our customers and community. With sophisticated systems in place to protect the air, land and water at and around the Landfill, we are committed to environmentally responsible operations. Be sure to visit our booth this Saturday at Viridian's "Bio Blitz" where you can learn more about the Landfill.

In preparation for Earth Day on April 22, Arlington Landfill is encouraging our community to take the **#1MorePledge**, and commit to **#1More** act of environmental stewardship or community service that helps to preserve our Blue Planet™. When trying to make a meaningful impact to help the environment, no act is ever too small, and every act counts.

As you consider what you can do to help our environment, we have provided three suggestions below.

- **Practice better recycling** by making sure your recyclables are EMPTY of their contents, CLEAN of any residue and DRY before placing them in a recycling container.
- **Learn about electronics recycling solutions** to help ensure obsolete electronics are recycled safely and responsibly.
- **Encourage the recycling of universal waste at work** to help your employer meet compliance requirements for items such as batteries, bulbs and ballasts, which should not be thrown away with regular waste.

Arlington Landfill is committed to our community as a good neighbor and responsible landfill operator. This Earth Day join us in making a commitment to our environment by visiting 1MorePledge.com to take the **#1MorePledge** as all of us work to protect our environment today and preserve it for future generations tomorrow.
